

2 Day Business Plan Boot Camp for MedTech & Life Sciences Startups held on 26 & 27 Aug 2016 at IITM Research Park, Chennai

FEEDBACK:-

- I had the opportunity to be in this Workshop & Boot Camp for Startup companies. It is inspiring, as people like me, who are basically Physicians and Scientists, who do not know ABC of business conversion of our research & products. Mr. Anand Govindaluri has given the complete basics needed for a startup in a very simple and the best possible way

Dr Sankaranarayanan

- This is a one-of-a-kind Boot Camp to align the perspective of a student towards entrepreneurship. I feel that it is particularly helpful to young scientists with novel ideas that would benefit the society. Mr Anand conducted informative, entertaining and meaningful sessions covering various aspects of startups. I am hopeful and look forward to associating with him in future. I thank Dr Arvinth for this opportunity and also IITM BioIncubator for the Initiative.

- Being a beginner in the startup world, my exposure to the requirements to build a company is limited. When I heard about this 2 day Boot Camp, I was eager to attend, strictly viewing it as an opportunity to meet people and exchange ideas and learn and expand my knowledge in the medical / life sciences investment sector. This 2 day Boot Camp has inbuilt in me the confidence to nourish my idea with all the ingredients confidently and build it into a full fledged happy company. All aspects that are required for a startup have been taught in detail and encouragement was provided for the betterment of the company and me. I came with a small idea (a dot in the centre of a football field) but left with confidence, knowledge and expertise covering the whole field – beneficial for life.

- It is an unbelievable experience for me to attend this valuable accelerator Boot Camp at the right time in my entrepreneurship journey. I believe strongly that spiritual power for making this interaction happen with Dr Arvinth & Dr. Anand in this workshop.
Workshop as the name indicates, is a true accelerator workshop with Dr Anand's leadership. He is humble and follows values of life. He shares practical experiences and understands ground reality of business. He is passionate about truly building entrepreneurs.

- The workshop was one of a kind. Exciting, Engaging & extremely informative.
The way of presentation, his own real life experiences, knowledge he shared, all were very useful and helpful for writing a business plan and motivating us for starting up. He taught us the process of taking an idea to the real world and how to get the funds to start it off.
